- Services Report- March 2019

SERVICES REPORT – March 2019

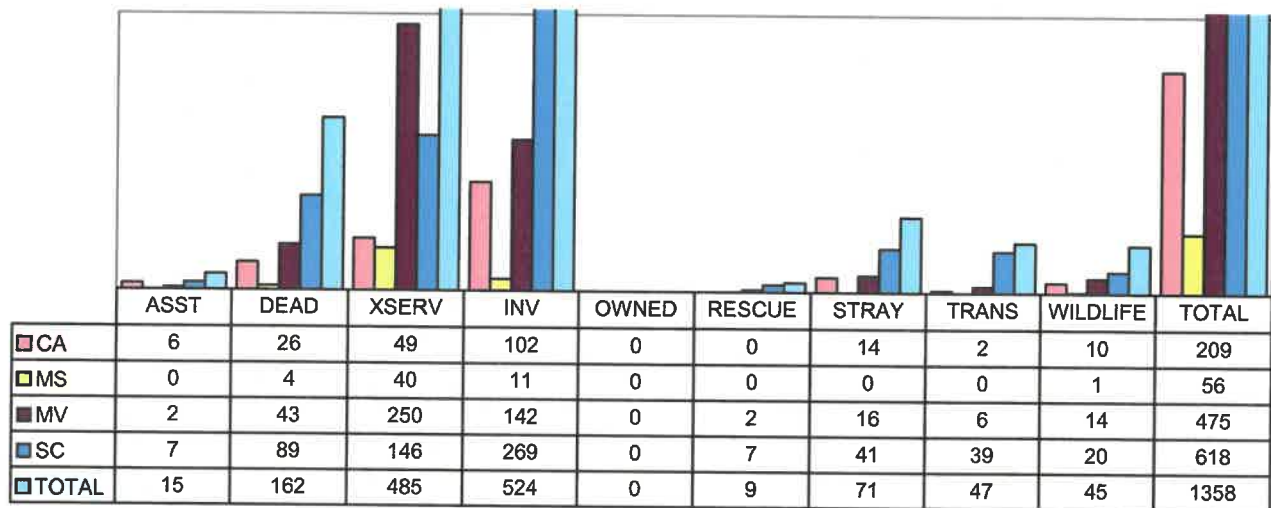

Introduction

This report provides graphs, tables and explanatory narratives covering five categories of information: field service calls, violations and citations issued, animals impounded, animals licensed, and animal outcomes. SVACA's fiscal year is July 1 – June 30.

1. Field Service Calls

Graph 1 is total service calls by Jurisdiction and Type and Graph 2a and 2b show the Sub-Types. Tables 1 and 2 are a comparison of fiscal years 2018-19 and 2017-18.

Graph 1 - Total Service Calls by Jurisdiction and Type for January/February FY 2018-19

5. Animal Outcomes

The following tables reflect how our dogs and cats were outcomed at the center for the reporting period. The following is based on the Asilomar Accords (www.asilomaraccords.org) which were generated by animal welfare professionals as a way for agencies to accurately report a "Live Release Rate," or how many animals had favorable outcomes. It also reports and categorizes why animals were euthanized. SVACA places all "healthy" and "treatable" animals as well as many "unhealthy" animals. SVACA's Animal Care Center is "no kill" as we annually save greater than 90% of animals received.

ANIMAL CARE CENTER ACCOMPLISHMENTS AND HIGHLIGHTS

OUTREACH

- Fundraising
 - We'll be holding our third annual Pour for Paws fundraiser at Black Ridge Vineyards in Los Gatos. Friends of SVACA will once again partner with us on this annual event.
- Volunteers
 - Our annual Volunteer Appreciation Gathering will be held on April 13.
 - Staff has been working with newer volunteers to get them trained in dog socializing.
- Outreach
 - The City of Campbell is partnering with SVACA for a Pet of the Month feature. In January, we brought Luna, a sight and hearing impaired puppy to City Hall and in February, we brought another puppy, Rolo. Both were big hits with city staff. In fact, Rolo was adopted by a City employee, who met Rolo on his visit!

- On January 19, we hosted a special Kiddies 2 Kitties program, in partnership with Palo Alto Humane Society for a very large group of Girl Scouts (consisting of four individual troops; 26 scouts in all!). They made fleece blankets for the animals for part of the visit and socialized with some young puppies and cats.
- On February 2, a group from the Pet Club at Wilcox High School came to present SVACA with fleece blankets and toys they made. They were given a tour of the Animal Care Center and socialized our adoptable animals.
- Staff worked with a group of Stanford students who were doing a project. They interviewed our Outreach Coordinator and went on a ride-a-long with one of our Animal Control Officers.
- We tabled at Ganado's Pet Feed Grand Opening at their new location in Willow Glen on February 16. It was well attended.

Luna was warmly welcomed by staff for the first Pet of the Month event!

Luna made her way through the entire building to meet everyone!

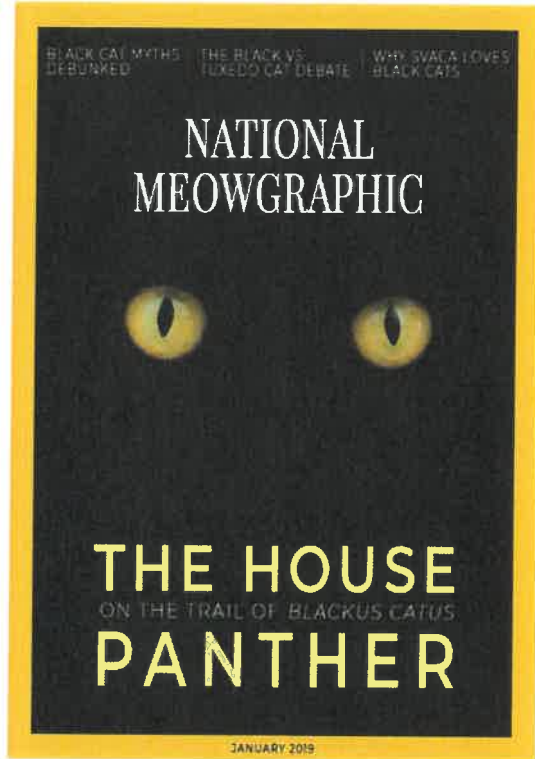

Rolo was shown some serious love on Valentine's Day!

Ganado's Pet Feed Grand Opening with Rolo and SVACA volunteers.

- Marketing
 - In an effort to increase our social media presence and raise awareness for black cats, we ran a series of clever magazine covers. We're happy to say, all the kitties have since been adopted! We're working on a dog series for future posts. Also, in the weeks leading up to the Oscars, we ran a series of posts called the "Pawscars." We continue our SVACA Singles series as a positive way to market our adoptables.

Samples of magazine covers featuring black cats.

Our "Pawscars" series.

SVACA Singles
Where everyone's relationship status is 'Adoptable'

Mr. Zack
 Fave Color: Fuzzy Grey
 Occupation: Expert cheese taster
 Hobbies: Chasing toys, snuggling, listening to podcasts
 Motto: Carpe Di-Mousie

SVACA Singles
Where everyone's relationship status is 'Adoptable'

Ms. Trixie
 Age: 11 years-ish
 Fashion Fave: Gray Tuxedo
 Local Sports Team: 49ers
 Fave Hangout: Top tier of the cat tree, coffee shops
 Motto: If you don't want me to fall asleep on it, don't put it where I can find it.

Mr. Corey
 Age: 5 months
 Occupation: Day-trader
 Fave Hangout: Cat tree, sunbeam, Tahoe in summer
 Likes: Mousies, chasing shoelaces, comic books
 Dislikes: People who read over his shoulder

Mr. Magoo
 Height: 1' 6"
 Secret Identity: 1930s matinee idol
 Hobbies: Playing ball, lounging, catalog modeling for extra \$
 Motto: I'm just as unique as everyone else.

SVACA Singles!

- Miscellaneous
 - Staff attended the February Friends of SVACA board meeting. Three new board members were elected.
- Media
 - We continue to submit Pets of the Week to The Campbell Express weekly.

SHELTER TEAM

- The following are a sampling of adoption cases that highlight the good work that staff does in an effort to find lifelong homes for all of our animal guests.
 - Sunflower arrived on New Year's Day and was quite nervous during her first couple of days at the Center. After a few days and the staff paying her extra attention with kind words and treats, she began to open up and became quite friendly. As she was being spayed by the medical team, a few health concerns came to light: teeth needed to be removed, severe dental attrition was seen, and there were several masses removed from her mammary area. Being a senior dog with health monitoring ahead of her, it's not unusual for animals like her to remain in shelters for months or not even make it into adoption galleries. Several families expressed interest but were concerned about her health history. Soon enough a family fell in love with her!

Bye, sweet Sunflower!

- A Santa Clara resident found Buggy in her front yard and brought him to the Center. He was a little shy to start but many of our volunteers spent time with him and it didn't take long for Buggy to become so friendly that his personality became more like a canine than a rabbit! His favorite thing to do was play with any and every rabbit toy he was given as well as perch on top of his castle like a king. Buggy's antics kept everyone laughing and his transformation from a wallflower to an outgoing and spirited rabbit was amazing to see. As a majority of folks come in looking to adopt a dog or a cat, it's fairly common for rabbits to be

guests for a longer period of time. After four months, Bugsy was adopted by a great family that has provided an entire bedroom for him to burn off his energy, play with toys, and hang out with his new human companions!

Have a fantastic life, Bugs!

- Luna was discovered at a local homeless encampment with several other dogs and puppies after an Animal Control Officer was alerted that the dogs were not confined. The other puppies thrived in our care and began to grow quickly, had great appetites, and functioned normally. Luna, however, was much smaller, could not eat on her own, and had very limited mobility due to her unusually short limbs. One of SVACA's medical staff took Luna home where she was fostered with a young kitten who became her little sidekick. After multiple veterinary exams and radiographs, along with information from her foster family, it was determined that Luna was almost completely deaf, visually compromised, and delayed with her movement and energy level. Despite all of these issues, she was very fond of interacting with her foster buddy and any human companions that would give her attention; she would often pay back the attention with kisses! Due to her young age, it was uncertain how she might develop over time and that was a bit concerning for most potential adopters. Puppies usually get adopted immediately but she patiently waited for just the right home that also happened to have a cat. Her patience was rewarded when her forever family came in and decided they could not leave without her. She now regularly goes to work with her new mom!

Goodbye, Miss Luna (now Bobo). We will surely miss you!

- Jenny was found by a concerned citizen in a well-known feral cat area when she was about four months old. She was afraid of humans so we placed her into our Happy Meower program to be socialized by qualified volunteers and staff. She was still quite introverted in the adoption gallery but did seem to respond with more confidence when other kittens were around. Frida and Jenny were eventually placed into the same room together when all of their roommates had been adopted. Frida's playfulness and affectionate behaviors were a comfort to

Jenny and this was made even more apparent when their forever family came in and chose to adopt them together!

Have a wonderful life together, ladies!

MEDICAL TEAM

- The following are a sampling of the good work that our medical team does day-in and out as we attempt to make sick and injured animals healthy so they can be adopted, released to a placement partner, or returned to their owner.
 - In January, we were inundated with puppies! While this is not the same influx we see during kitten season, it still requires the support of foster families. Petey, a 6-7 week old lab mix, arrived alone and was followed by Mausie, a German Wirehaired Pointer of about the same age, later that week. In between their arrivals, three bull mastiff puppies were corralled after running amok in a Santa Clara parking lot and were originally seen with a homeless person. We could not locate an owner and Larry, Moe and Curly, as they became known, quickly gained a place in our hearts. These babies were all of 7 weeks old and already over 20 pounds! They stayed onsite with SVACA staff while the two smaller pups went into foster care with one of our experienced families. During their stay, the brothers experienced a bout of stress colitis. This is not unusual for animals when undergoing the stress of environmental and dietary changes (they were most likely scavenging for food before they arrived to us) while still physically growing and changing by the minute. They were started on an antibiotic and their tummies returned to a normal, happy status. We are happy to say Larry, Moe and Curly were quickly adopted; as were Mausie and Petey!

Happy families, all around!

- Mr. Bean a 9 year old Papillon was found meandering near the Pruneridge Golf Course in Santa Clara. In his initial few days with us, his appetite was spotty but his attitude was perky and outgoing. We quickly discovered that his teeth were probably slowing down his eating; he had moderate dental disease which is quite common for small breed dogs. He was not reclaimed so with the support of the Friends of SVACA we scheduled dental work for him which resulted in the extraction of 17 teeth which is not uncommon for a small breed dog. Post-operatively he began eating everything he was offered and was spunkier than ever. He was adopted just a few short days after being made available for adoption!

Stealing hearts with his smile!

- Abby was found running at large in her neighborhood and citizens were concerned for a myriad of reasons. This German Shepherd Dog mix, about 2 years old, was not only running amok and terrified but had an obvious skin condition. Residents were quite concerned for her health; when Officer Morris collected her in the field, she shared their concerns. In addition to being emaciated, Abby was missing hair from the majority of her body and her skin was severely inflamed. She was brought back to SVACA where she received treatment at receiving and was started on a feeding plan. At only 50 pounds, it was suspected she was 10-15 pounds underweight due to improper nutrition. She was started on antibiotics and medicated baths to treat and relieve pain and discomfort from her skin condition. Abby's guardian was located and relinquished her to us as he was unable to provide proper medical care. He was also issued a citation for violating California Penal Code 597, "Crimes Against Animals," for the unnecessary suffering she sustained while in his care. During her stay, she gained approximately 15 pounds; this was most evident in the increase of her muscle mass. Her personality went from being depressed and lethargic to outgoing and exuberant. She was with us for about 6 weeks; her improvement was uplifting but had a long way to go to have a full recovery. Our Outreach Coordinator worked to find her a suitable placement partner where she will continue medical treatment in a home setting to ready her for a forever family!

A true rags to riches story!

FIELD SERVICES TEAM

- In Santa Clara, Officers Gonzalez and Truong responded to a report of a kitten stuck in a storm drain. The reporting person stated that he was able to hear meows coming from the abyss. The bottom of the storm runoff catch basin was approximately 6 feet down from street level and a few 8 inch pipes fed off of the catch basin. With the use of some yummy cat food, the kitten was lured out of the pipe, placed into a kennel and hoisted to safety. The little kitten named Storm was assessed medically and after his holding period, he was placed into our adoption gallery where he was adopted a few days later.

"Storm" following the food that Officer Gonzalez had placed into the pipe.

Officer Gonzalez hoists "Storm" from drain.

- In Campbell, Officer Truong responded to a report of a dog bite on the Los Gatos Creek trail. A video was provided by the victim and Officer Truong recognized the dog and its owner due to previous dealings with him. The dog was impounded and a Dangerous Dog investigation was conducted. An administrative hearing was held and the dog was deemed dangerous. The owners complied with all of the restrictions that go along with owning a dangerous dog.
- In Santa Clara, Officer Morris responded to a report of 3 orphaned raccoons, known as kits, found in a debris hauling truck. Officer Morris confined the sleeping beauties to a carrier and transported them to the Wildlife Center of Silicon Valley for care. In the wild, kits stay with their mother for about a year before venturing off on their own. These little ones should be released in a few months!

Sound asleep after knowing they were in good hands. Good job, Officer Morris!
