Department Statistics

RECOMMENDED MOTION

That the statistics of SVACA activity be received and filed.

DOCUMENT ATTACHED

- Services Report- March 2021

SERVICES REPORT – MARCH 2021

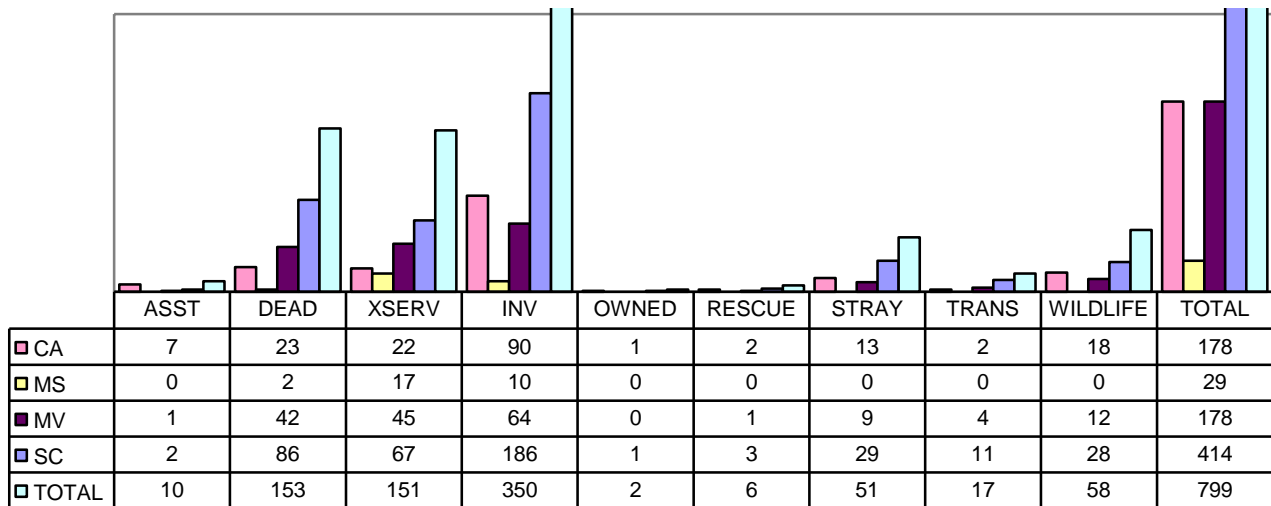

Introduction

This report provides graphs, tables and explanatory narratives covering five categories of information: field service calls, violations and citations issued, animals impounded, animals licensed, and animal outcomes. SVACA’s fiscal year is July 1 – June 30.

1. Field Service Calls

Graph 1 is total service calls by Jurisdiction and Type and Graph 2a and 2b show the Sub-Types. Tables 1 and 2 are a comparison of fiscal years 2020-21 and 2019-20.

Graph 1 - Total Service Calls by Jurisdiction and Type for January/February FY 2020-21

ASST = ASSISTANCE XSERV = EXTRA SERVICE CALL INV = INVESTIGATIONS TRANS = TRANSPORT

5. Animal Outcomes

The following tables reflect how our dogs and cats were outcomed at the center for the reporting period. The following is based on the Asilomar Accords (www.asilomaraccords.org) which were generated by animal welfare professionals as a way for agencies to accurately report a "Live Release Rate," or how many animals had favorable outcomes. It also reports and categorizes why animals were euthanized. SVACA places all "healthy" and "treatable" animals as well as many "unhealthy" animals. SVACA's Animal Care Center is "no kill" as we annually save greater than 90% of animals received.

Table 13 – January 2021

The collection and publication of this data is sponsored by Maddie's Fund, www.maddiesfund.org

ANIMAL CARE CENTER ACCOMPLISHMENTS AND HIGHLIGHTS

- SVACA team members continued to work through the global pandemic caring for the community's animals and protecting the public's health and safety. Services continued to be provided and public contacts continued to be performed outdoors and with staff in appropriate PPE. Due to SVACA's attention to safety protocols, all staff have been healthy and we have yet to have a COVID-19 positive case. Staff have also started to receive vaccinations which will continue to help keep our team and the community healthy. The spay/neuter clinic reopened in February after the stay-at-home order was lifted and we hope to expand services in the weeks and months ahead as conditions allow.

OUTREACH

- Fundraising
 - We held an event meeting to map out what we think we can hold in 2021-22 due to the pandemic. One idea is to hold a park-a-thon fundraiser where participants would visit multiple dog parks in our cities.
 - The Holiday Shopping Spree Campaign for Pet Food Express raised \$3,219, which was transferred to gift cards to spend in their store. The cards will help purchase foster supplies and other needed items throughout the year.

Thank you, Pet Food Express!

- Volunteers
 - Our in-house volunteer program was still on hold due to the pandemic.
- Marketing
 - Staff continued sending a monthly newsletter, *So, What's the Scoop*, to our followers and contacts, giving them an update of what has been happening during the pandemic.
- Media
 - Our Outreach Coordinator was interviewed by Mary Larsen of the Los Altos Town Crier for their annual Family Spotlight Magazine (also distributed in Mountain View) in regards to adopting during the pandemic.

A fur-ever home

What families should know before adopting a pet during the pandemic.

By Mary Larson
Staff Writer

With the family working and a lot of time on their minds, pet owners are being urged to think about the pandemic when it comes to adopting a new pet. It's not just about the pet's health, but also about the family's ability to care for the pet during these uncertain times.

Our families of Pets in Need have white fluffy puppies.

In the time of COVID, the pandemic has led to a dwindling supply of adoptable pets, according to Patsy N. Miller, who supports the Los Angeles Humane Society. Miller said that while there has been a surge in adoptions, she's also seen a rise in returns. "It's not that the adopter is suddenly being mean," she said. "It's that the adopter is suddenly being overwhelmed."

Dr. Thomas Hunter, a veterinarian at Adobe Animal Hospital in Los Angeles, said that veterinary hospitals have seen a significant increase in pet adoptions. "There are probably a lot of reasons for this," he said. "One is that people are looking for a pet to help them cope with the stress of the pandemic. Another is that people are looking for a pet to help them cope with the stress of the pandemic."

Finding the right fit is crucial during these times. "It's not just about the pet's health, but also about the family's ability to care for the pet during these uncertain times," Miller said. "It's important to think about the pet's needs and the family's ability to meet those needs."

- Outreach
 - The COVID-19 Relief Fund/Companion Animal Cupboard continues to help our community's residents impacted by the pandemic. We've spayed, neutered and vaccinated several cats so far and continue to provide food and supplies on a monthly basis to participants.

SHELTER TEAM

- The following are a sampling of adoption cases that highlight the good work that staff does in an effort to find lifelong homes for all of our animal guests.
 - Grayson arrived in a humane cat trap exhibiting symptoms of a severe upper respiratory infection along with signs of being friendly. He was prescribed antibiotics and quickly improved. He was made available for adoption and a virtual meet and greet was scheduled to meet a potential adopter who was looking for a friendly cat who was laid back. He felt he had the perfect demeanor and wound up adopting him. He tells us Grayson has become more affectionate and they have a wonderful relationship.

Goodbye, handsome!

- Zoomie arrived as a stray and while she was being scanned during her receiving exam, a microchip was located. We contacted the registered owner who told us he rehomed her six months earlier because she was too energetic for the household. After reaching out to the current owner, he expressed regret that he was not in a position to reclaim Zoomie for both financial reasons and not having

enough space or time for her in his small apartment. It was easy to conclude that Zoomie had no training and a whole lot of energy and spirit. Staff began to work on training her to sit as well as helping her get out her wiggles and energy with a lot of playtime and exercise. Zoomie hit the lottery when an active family adopted her because not only did they have space for her to run and play, but they had an active German Shepherd! The family recently shared photos of Zoomie having fun at home, a park, and a beach. Suffice it to say, she found her wonderful forever home!

Enjoy your happily-ever-after, Zoomie!

MEDICAL TEAM

- The following are a sampling of the good work that our medical team does day-in and out as we attempt to make sick and injured animals healthy so they can be adopted, released to a placement partner, or returned to their owner.
 - Shortly after the new year arrived, a community cat arrived with a large abscess on his shoulder which was lanced and drained at intake and antibiotics were given to treat the infection. After a few days of healing, he was neutered and readied for release back to his community.

Keeping community cats healthy!

- In late January, a stray domestic long hair arrived with injuries to her ear, neck and wrist so the areas were cleaned and she was started on antibiotics. One of the areas required additional care as PJ was not healing as expected. A foreign body was found deep in the tissue and was removed. A drain was placed to aid in healing and she quickly returned to her happy-go-lucky self. Soon after being placed into the adoption gallery, she quickly found her forever home!

Healed and waiting for her regal mane to return!

FIELD SERVICES TEAM

- In Santa Clara, Officer Gonzalez responded to a report of an injured peregrine falcon. She safely confined and transported her to the Wildlife Center of Silicon Valley for treatment.

The cautious falcon was very thankful for Officer Gonzalez's help!

- In Mountain View, Officer Morris responded to a report of a skunk stuck in a construction site. She was able to safely capture the skunk and move him to a more suitable area.

Lil' stinker.

- In Santa Clara, Officer Morris responded to a report of a dog in the roadway. Thank goodness a pile of pine needles was all that needed moving.

Big or small, we respond to them all! In this case...pine needles!

- In Santa Clara, Officer Morris responded to a bite investigation involving a stray cat she found hiding under a large pillar near the front of a building. With the help of Field Services Manager Pedrotti, they were able to safely catch her. The cat was held at SVACA for the quarantine period, ultimately given a clean bill of health and placed with a placement partner. The victim was thankful for our work and learned a valuable lesson when it comes to petting stray cats.

Trying to locate our little hider.

Gotcha!

- In Santa Clara, Field Services Manager Pedrotti seized several dogs living in improper conditions. A post-seizure hearing was held and a hearing officer determined the dogs were lawfully seized. The owner reclaimed three and surrendered the others who were later adopted or placed with a placement partner. The owner was issued a citation for the violations and the case is pending.
